

## Synthetic Roofing Felt

Asphalt felts have finally met their match. ProFeltPlus™ is a mechanically attached\* alternative to traditional felts, offering superior strength and performance, and contains no asphalt.

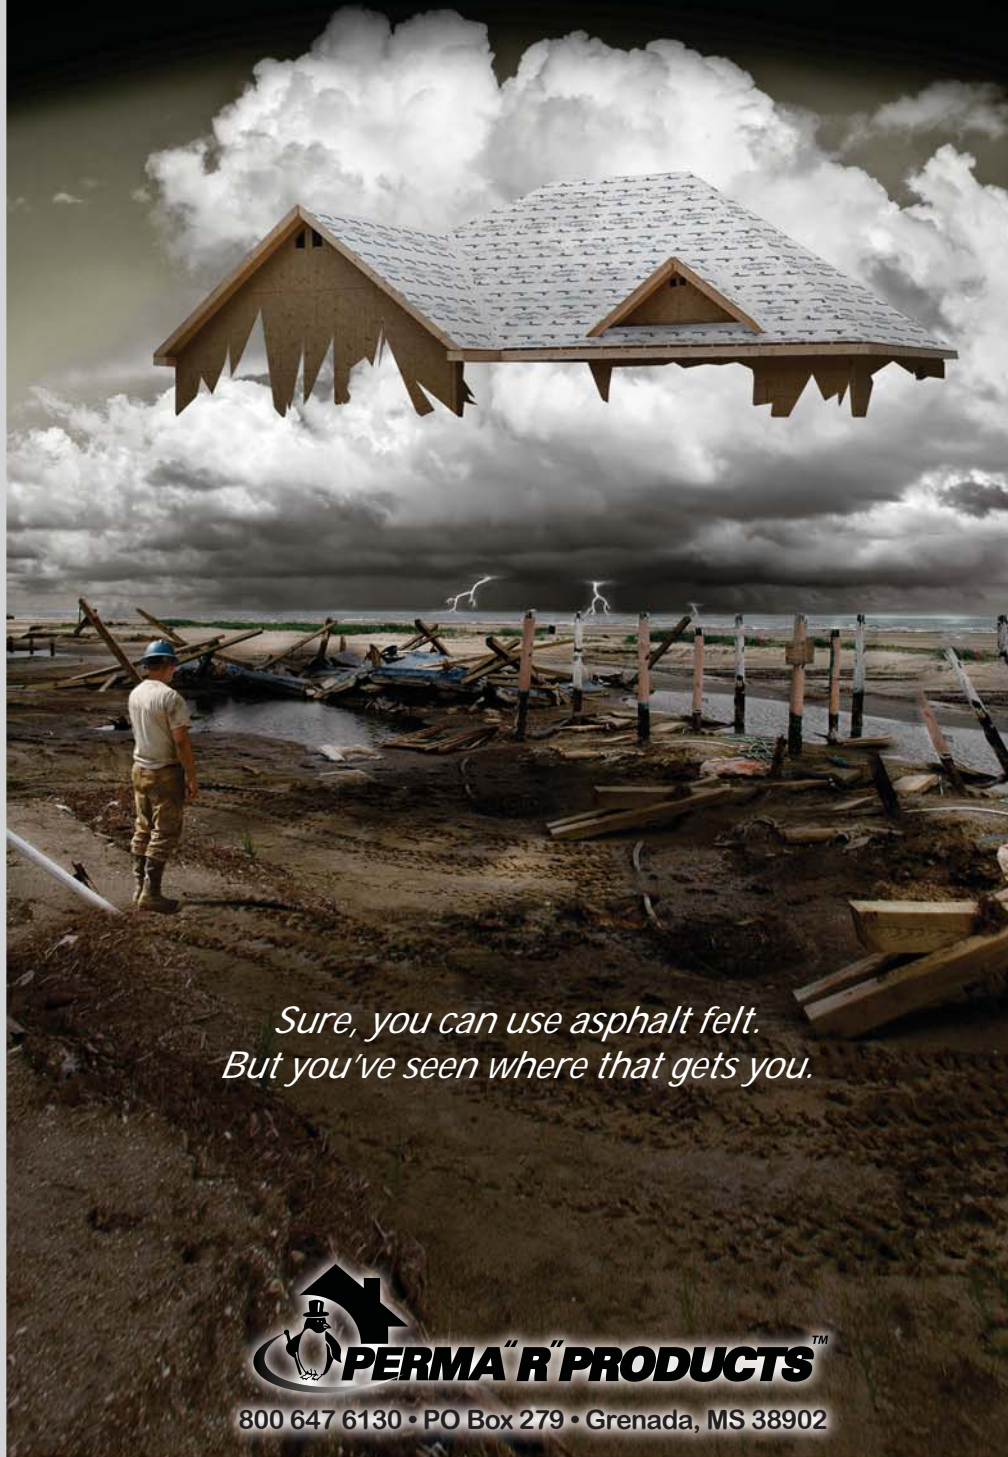

ProFeltPlus is a coated woven polyolefin fabric that will not tear under foot or in high winds. It stays in place, just like a roof underlayment should. Being strong doesn't mean it has to be heavy. ProFeltPlus weighs only 22 pounds for a 10 square roll, giving your back a much needed rest when hauling roofing materials on the job. And with an industry leading 30 year warranty, ProFeltPlus gives you peace of mind.

- Better walking surface
- Contributes to LEED points
- Will not wrinkle
- 30% lighter than felts
- Better UV resistance
- Cuts easy
- Faster installation
- Less fasteners needed
- Saves time and labor
- Fewer laps
- Less inventory

**ProFeltPlus™**

When all else fails,  
ProFeltPlus™ will still be there.

*Sure, you can use asphalt felt.  
But you've seen where that gets you.*

**PERMA"R" PRODUCTS™**
